

Task: Build a Fast-Food Ordering App with ReactJS

Objective: Your task is to construct a fast-food ordering app using ReactJS. The app should include key functionalities such as **displaying the menu**, **adding items to the order list**, **managing the number of items**, **calculating the total price**, and **implementing dark/light theme switching**.

Functionalities:

1. Display Fast Food Menu
2. Implement Add to Order Functionality
3. Implement Quantity Management
4. Implement Dark/Light Theme Toggle

The topics covered in this task include:

- ✓ React Components
- ✓ State Management
- ✓ Event Management
- ✓ Styling with Bootstrap
